I really enjoy the Traffic and Weather Channels on XM radio. I am paying for services like these. If I drive to Austin and I am not in range to get Austin local stations, I should be able to hear the traffic and weather so I know what lies ahead. I should not have to wait until I get in range and then hope that the local station I choose gets to the traffic report before I get stuck in traffic. Please reject NAB's petition 04-160.
